

**LABORATORY REPORT No. 22121T2161 from 21/01/2022**

(00217)Uranus Plaza #, collected: 21/01/2022 14:41, performed: Bioclinica SA Laboratory, Timisoara, 53B Cetatii Blvd.

BOSNA MARINEL LILIAN, 21 years, M, CS, Otelu Rosu, Constructorilor, 3, CNP:5001011114091, tel: 0740536589

=====REF.RANGE=====

HISTORY=====

Antigen SARS-Cov-2 qualitative...**Negative**

(Negative)

Sensitivity: 99,12%

Specificity: 99,66%

A negative result does not rule out an infection by SARS-CoV-2.

A positive result indicates the presence of the SARS-CoV-2 viral antigen, but clinical correlation with the patient's history and other diagnostic information is necessary to determine the infection status.

If the clinical suspicion persists, RT-PCR RNA SARS-CoV-2 testing is recommended.

(nasal swab, Immunochromatography)#

The tests and sampling points marked (#) are not covered by RENAR accreditation.
